NEW ZEALAND TRANSSHIPMENT EXEMPTION

WCPFC8-2011-DP/02
28 October 2011

Paper prepared by New Zealand
24 October 2011

Professor Glenn Hurry  
Executive Director  
Western Central Pacific Fisheries Commission  
Po Box 2356  
Kolonia, Pohnpei 96941  
Federated States of Micronesia

Dear Glenn

CMM 2009-06 Transhipment from purse seine fishing vessels – revised New Zealand application for exemption from prohibition of at-sea transhipment

TCC7 considered New Zealand’s application for a 5-year exemption from the prohibition on transhipment at sea by purse seine vessels pursuant to CMM 2009-06. Following deliberations, TCC7 recommended that New Zealand be granted a one-year exemption rather than the 5-year exemption originally sought. In accordance with this recommendation, New Zealand wishes to formally apply for a one-year exemption from the prohibition on transhipment at sea, as set out below.

Paragraph 25(b) of CMM 2009-06 provides for transhipment activities involving New Zealand-flagged domestic purse seiners where the fishing activity, transhipment and landing of fish all take place within New Zealand fisheries waters in accordance with New Zealand’s existing legal and operational framework for monitoring and control of transhipment activity and the verification of catch.

Paragraph 26 of CMM 2009-06 provides that CCMs seeking to apply for an exemption for a vessel(s) that meets the conditions set out in paragraph 25 shall submit a written request to the Executive Director by 1 July of a given year. That request shall include, at a minimum, certain information provided below:

a) Details about vessel(s) as they are required to appear on the WCPFC Record of Fishing Vessels under CMM 2004-01:

The following purse seine vessels do not fish outside of New Zealand’s EEZ and so are not required to be listed on the WCPFC Record of Fishing Vessels.

<table>
<thead>
<tr>
<th>Vessel Name</th>
<th>Call Sign</th>
</tr>
</thead>
<tbody>
<tr>
<td>Western Ranger</td>
<td>ZMNN</td>
</tr>
<tr>
<td>Waihola</td>
<td>ZMIN</td>
</tr>
</tbody>
</table>
San Tortugas ZM2248
San Columbia ZMA2925
Tawera 11 ZM4336
Matariki II ZM2579

Additional details of these vessels can be provided if necessary.

The following purse seine vessels are already on the WCPFC Record of Fishing Vessels and may also be involved in transhipment at sea when fishing within the New Zealand EEZ.

<td>ZMAS</td>
</tr>
</tbody>
</table>

New Zealand will notify the WCPFC if there any changes to the vessels listed above during the term of any exemption granted by the Commission.

b) The vessels’ history of prior transhipment exemptions:

In the past, New Zealand has had a prior exemption for purse seine transhipment at sea by virtue of being an FFA Member holding an exemption in accordance with Article 29(5) of the Convention. At WCPFC7 in December 2010, the Commission approved a specific exemption for New Zealand under the terms of CMM 2009-06.

c) The main species and product forms that would be transhipped:

The main species to be transhipped is skipjack (*Katsuwonus pelamis*). The product would be in frozen whole (green) form.

d) The areas where transhipments would take place, to as much detail as possible:

Transhipments will take place within New Zealand fisheries waters, subject to prior approval by the New Zealand Ministry of Fisheries. A copy of the New Zealand Transhipment Approval Conditions accompanies this letter.

More exact locations are difficult to define as transhipment will be dependent on where the vessels are fishing at the time. The general area transhipment occurs is off the east coast of the North Island of New Zealand.

e) The period of exemption being requested:

A one year period from 1 January 2012 to 1 January 2013.

f) An explanation for the exemption request:

An important consideration for New Zealand is the economic viability of fishing operations within New Zealand fisheries waters. The New Zealand EEZ is the fourth largest in the world, and some
fishing grounds are up to 600 miles from the nearest port. A requirement to only tranship in port would be impracticable for our industry.

Further to this, New Zealand has in place a comprehensive transhipment management and monitoring scheme for vessels operating within our EEZ. This fits within a broader catch reporting regime that tracks fish from capture through to market and incorporates routine monitoring and auditing. This ensures that the intent of Article 29 of the Convention is met.

If clarification or further information is required, please do not hesitate to contact me.

Yours sincerely

Ministry of Fisheries
New Zealand Transhipment Scheme

Transhipment by any vessels within the New Zealand Exclusive Economic Zone (EEZ) and New Zealand flagged vessel on the high seas or in other jurisdictions is subject to stringent measures to ensure all fish transhipped is properly accounted for and the operation is conducted in abeyance with applicable rules.

General requirements for vessels seeking to tranship

Before any transhipment can take place the fish must have been caught subject to an appropriate authorisation and in accordance with any conditions of that authorisation.

Fishing vessels and carrier vessels operating in the New Zealand EEZ must be registered under New Zealand Fisheries legislation. For fishing vessels, they must also fish to a valid fishing permit.

New Zealand flagged fishing vessels and carriers wishing to operate (catch or transport fish) on the high seas must, in addition to vessel registration under the Fisheries Act, also obtain a New Zealand High Seas Fishing Permit. This permit carries with it a number of conditions relating to notifications, VMS, transhipment and restrictions.

In other jurisdictions, New Zealand fishing vessels and carriers must comply with the requirements of the Coastal State in terms of licensing, conditions and local laws. Failure to do so is an offence under New Zealand Fisheries law.

Priority approval must be granted for transhipment

The operator, notified user, or master of a fishing vessel or carrier must obtain prior approval for transhipment from the Ministry of Fisheries and comply with any conditions that the Chief Executive sees fit to impose.

For New Zealand vessels seeking to tranship in other jurisdictions they must comply with the Port or Coastal States requirements. It is an offence under New Zealand Fisheries law if the vessel fails to comply with such requirements.

Standard conditions applying to transhipments

Specific conditions applying to approvals for transhipment can vary depending on the particular circumstances of the proposed transhipment. The intent of the conditions being imposed is to ensure verification of all species and quantities of fish that are transhipped.

The standard conditions applied to both fishing vessels and carriers conducting transhipments are the requirements to report to the VMS; carriage of observers; the completion and submission of documentation; and notification requirements.

An example of approval conditions for transhipment within the New Zealand EEZ are attached as an example.
**New Zealand Transhipment Approval Conditions**

This approval is subject to the following conditions:

1. All transhipments pursuant to this approval must take place within New Zealand fisheries waters.
2. All fish transhipped pursuant to this approval must be landed to a Licensed Fish Receiver.
3. A copy of this approval must be placed on board the vessel and made available for inspection by a fishery officer.
4. This approval may be varied or revoked at any time.
5. This approval expires on [insert date] unless earlier varied or revoked.

**Notice of transhipments**

6. Written notice of the intention to tranship under this approval is to be provided prior to the commencement of the transhipment to the New Zealand Fisheries Communication Centre.

The written notice must include the following details:

   i. Name of holder of approval
   ii. Catcher vessel name and international radio call sign
   iii. Carrier vessel name and international radio call sign
   iv. Date and time of commencement of transhipment (in New Zealand Standard Time)
   v. Position where transhipment is to take place
   vi. Species to be transhipped.

7. Should any of the details in condition 6 change, the holder of this approval is to send written notice immediately to the New Zealand Fisheries Communication Centre.

8. Written notice of the completion of the transhipment is to be provided to the New Zealand Fisheries Communication Centre.

The written notice must include the following details:

   i. Name of holder of approval
   ii. Catcher vessel name and international radio call sign
   iii. Carrier vessel name and international radio call sign
   iv. Date and time of completion of transhipment (in New Zealand Standard Time)
   v. Position where transhipment was completed
   vi. Species, state and an estimate of the quantity in kilograms of fish transhipped.

9. A copy of all communications between the vessel and the Ministry of Fisheries must be retained on board the vessel for the duration of the validity of this approval.
**Automatic Location Communicators**

10. When operating under this approval, an Automatic Location Communicator (ALC) is to be carried and operated by the catcher vessel and carrier vessel in accordance with the Fisheries (Satellite Vessel Monitoring) Regulations 1993 and Circulars issued by the Chief Executive under those regulations. Note that any reference to the 'vessel operator' in these regulations should be read as a reference to the holder of this approval.

11. The approval holder must meet all costs arising from ensuring compliance with the requirements of the Fisheries (Satellite Vessel Monitoring) Regulations 1993.

**Observers**

12. When operating under this approval, a Ministry of Fisheries Observer is to be carried on board the carrier vessel for the purpose of monitoring transhipments.

13. Prior to a transhipment commencing, the following items from the catcher vessel shall be made available to Ministry of Fisheries Observers on the carrier vessel.

   i. The vessel’s Certificate of Registration  
   ii. The Catch Effort Logbook or the Trawl Catch Effort and Processing Return  
   iii. The Catch Landing Log or the Catch Landing Return  
   iv. The Navigational Logbook  
   v. A Cargo Plan of fish on board  
   vi. Documents (passport/Certificate of Competency) that confirm the Master's identity.

14. The Cargo Plan must be signed by the Master of the Catcher vessel and shall include:

   i. The total weight of catch on board  
   ii. The total weight of each species by Processed State  
   iii. The carton markings used for each species by Processed State  
   iv. Number of cartons of each species by Processed State

15. The approval holder must meet all costs arising from carriage of an observer.

**Note:**

i. This approval only applies to fish taken in New Zealand fisheries waters in accordance with a current fishing permit.

ii. This approval does not alter any other rights or responsibilities under Fisheries legislation.
