DRAFT STRATEGIC PLAN
WCPF9-2012-FAC6-07

Introduction

As agreed to in WCPFC7, the Strategic Plan would be adopted “as a living document that will incorporate the ongoing work of the Commission subsidiary bodies and Annual Sessions.” The attached document is the Draft Strategic Plan for the Commission for the period from 2013-2015 adopting the recommendations from the WCPFC8 and the Subsidiary bodies.

Recommendation

The Committee is invited to:

(i) consider the Draft Strategic Plan and make the necessary recommendation to the Commission
1. Introduction

1.1. Context

**STRATEGIC VISION:**

Effective management, long-term conservation and sustainable use of highly migratory fish stocks in the WCPO for present and future generations through the application of precautionary fisheries management, based on the best scientific information available, while minimizing adverse social and environmental impacts and giving full recognition to the special requirements of developing States Parties to the Convention, in particular of Small Island Developing States (SIDS) and territories.

The Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (the Commission) is the custodian of the world’s largest tuna fishery. The harvest of tunas from the WCPO in **2011 was estimated at 2.25 million tonnes**. This harvest represents just over 84% of the Pacific Ocean tuna catch and 55% of the global tuna catch.

The principal fishing methods in this fishery are purse seine (75%), pole and line (7%), and longline (10%). The remainder of the harvest is taken by a variety of commercial and artisanal gears including troll and hand-line principally in eastern Indonesia and the Philippines.

The tuna catch is dominated by skipjack, accounting for approximately 71% of the harvest, yellowfin (19%), bigeye (5%) and albacore (5%). Non-target associated, dependent species and bycatch taken in association with tuna fishing operations include billfish, turtles, sharks, rays and sea birds.

A substantial portion of the WCPO falls under the national jurisdiction of coastal States that exercise sovereignty over their Exclusive Economic Zones (EEZs). The majority of these coastal States in the WCPO are Small Island Developing States (SIDS) and Territories. Unique among tuna Regional Fisheries Management Organizations (RFMOs), approximately 80% of the catch of species under the purview of the Commission is taken within EEZs.

In addition to national and regional socio-economic importance within the WCPO, the region’s tuna resource makes a major contribution to global food security. Since 2000 the tuna harvest from the WCPO has increased by approximately 50% with vessels based
in developing coastal States in the region gradually accounting for a larger proportion of the catch.

The Commission’s membership exhibits a range of cultural, social and economic diversity. It includes some of the world’s largest industrialized economies and some of the least developed. Coastal States, some with developing fleets and fishing industries, as well as the traditional distant water fishing nations that have operated in the area for many years participate in the Commission on an equal footing. Although the Commission’s small island State members are currently reliant on revenue from the licensing of foreign fleets they have aspirations to maximize long term sustainable returns from the harvest of tuna resources, including developing their own domestic fisheries in high seas waters of the WCPO.

1.2. Purpose

This Strategic Plan (the Plan) is a living document and has been prepared to provide a structured guide that will help both the Commission and the Secretariat to identify how the actions will be taken, tasks accomplished and challenges met in an efficient and timely way so as to provide the best possible support to the Commission and its Members, Cooperating non-Members and Participating Territories (CCMs).

This Plan has been updated to guide the development of the Commission and the activities of the Secretariat through 2015. It describes the priority tasks and principle strategies for the effective and efficient implementation of the Convention. Without prejudice to future decisions of the Commission, it elaborates on the objectives and direction that are necessary to address these priorities, the benchmarks (performance indicators) against which an assessment of progress towards achieving objectives can be measured, and the relationships and partnerships that will assist in achieving the objectives for the successful implementation of the Plan.

2. Strategic Objectives

Table 1 – Planned operational activities and performance measures

species and fishing effort, as well as information from national and international research programmes, disseminated in accordance with Commission rules and procedures.

- Effective monitoring, control and surveillance conservation and management measures are adopted and implemented by the Commission and enforced by its members.

- Establish and implement appropriate cooperation mechanisms for effective MCS and enforcement;
- Monitor the level of compliance with conservation and management measures adopted by the Commission and develop processes to address non-compliance, including through the use of positive and negative remedies.

- MCS tools are adequately funded and operational;
- Level of non-compliance and trends in contraventions;
- Extent of detected IUU fishing activities;
- Level of implementation of MCS measures (i.e., number of CCMs conducting port inspections, HSB&Is, etc).

- Full recognition of the special requirements of developing State Parties to the Convention, in particular small island developing States, and of territories in relation to conservation and management of highly migratory fish stocks in the Convention Area and development of fisheries for such stocks

- The Conservation and Management Measures adopted by the Commission take into account the special requirements of developing State Parties, in particular small island developing States and of territories;
- Establish mechanisms for cooperation with developing States and territories, which may include provision of financial assistance, assistance relating to human resources development, technical assistance, transfer of technology including through joint venture arrangements, and advisory and consultative services. These may be delivered on a bilateral basis with developing States and territories, or through WCPFC Special Requirements or other funds established for this purpose;
- Adopt and implement a capacity development strategy, including a fisheries scholarship scheme, for nationals from developing States, particularly SIDS and territories;
- Distribution of funds available in the Article 30 Fund in accordance with TORs for the full range of allowable activities.

- Special Requirements Fund, and other WCPFC funds established for this purpose, assessed for their contribution to capacity building for developing State members;
- SIDS representation among office bearers and Secretariat of the Commission;
- The level of funding contributed to the Article 30 Fund or the Commission to assist developing CCMs;
- Number of nationals from developing States, in particular from SIDS and territories, who have received scholarships and have completed degrees in the areas of fisheries science, fisheries management, fisheries MCS, fisheries development, and law.

- High quality and efficient administrative and technical support to the Commission Members and other stakeholders are provided by the Secretariat.

- Receive and transmit the Commission’s official communications;
- Compile and disseminate the data necessary to accomplish the objective of the Convention;
- Prepare administrative and other

- Level of satisfaction by CCMs with provision of support by Secretariat;
- Ensure pay and remuneration are competitive with other regional organizations;
- Ensure housing is of a standard
reports for the Commission and subsidiary bodies;
• Administer arrangements for monitoring, control and surveillance and the provision of scientific advice;
• Publish and promote the decisions of the Commission and its subsidiary bodies;
• Provide treasury, personnel and administrative functions that are operational and efficient;
• Deliver the agreed annual work program of the Commission within budget;
• Manage the logistics of the annual meeting of the Commission and any meetings of the Commission’s subsidiary bodies;
• Retention of staff.
• Improve and develop the IMS system to support the activities of the Commission

Acceptable to Secretariat staff.

• Adopt conservation and management measures for bigeye, skipjack and yellowfin tunas that will ensure long-term sustainability and promote optimum utilization.

• Ensuring that WCPFC conservation and management measures do not result in transferring, directly or indirectly, a disproportionate burden of conservation action onto SIDS and Territories.

• Ensure that Scientific Committee has appropriate capacity to provide Commission with best scientific advice available.

• Adopt measures to ensure that the Commission has the necessary monitoring, control and surveillance tools in place to ensure compliance with CMMs and address illegal fishing.

• Manage the impacts of highly migratory species fisheries on vulnerable bycatch species (e.g. sharks) and non-fish bycatch (e.g. seabirds, turtles).

• Ensuring that measures adopted permit or promote the development of domestic fishing and related industries of developing States, in particular the least developed SIDS and Territories, year on year, of the total Western and Central Pacific fisheries-associated industry, while also ensuring that such
measures do not undermine the conservation and management of HMS stocks.

- Provide the Secretariat with necessary capacity to support the work of the Commission, while recognizing the need for budgetary restraint.

### 3. Monitoring and Review

Every other regular session of the subsidiary bodies of the Commission will review the elements of this Strategic Plan that relate to its functions. The outcomes of the review in each subsidiary body will be consolidated by the Secretariat in a concise summary report that identifies the achievements and challenges associated with the implementation of this Strategic Plan. The report will be presented to the next regular session of the Commission.

The report will identify those tasks and strategies described in the Strategic Plan that have been successfully completed, progress with implementation of those tasks that are ongoing and those tasks scheduled for future implementation. The Commission will consider options for addressing constraints and challenges associated with implementation of this Strategic Plan.

A comprehensive review of this Strategic Plan will be undertaken by the Commission in the third year of its implementation. The review will assess the content of the Strategic Plan, and progress with its implementation, against international obligations and the provisions of the Convention. On the basis of the review the Commission will adopt a revised Strategic Plan to serve the subsequent 3 years.
