Previous consideration by the Scientific Committee

1. The two previous annual sessions of the Scientific Committee (SC) and the Statistics Specialist Working Group (ST-SWG) have considered scientific objectives, priorities and data fields for the Regional Observer Programme.

2. The Third Regular Session of the Scientific Committee, 13-24 August 2007 at Honolulu, USA recommended the text contained in Appendix III of Attachment K of the SC3 Summary Report be used as the starting point for future discussions on the minimum fields of scientific data to be collected by the ROP.

3. The SC noted that:
   a) The list of data fields contained in Appendix III of Attachment K is provisional and requires more consideration and refinement (by other

---

subsidiary bodies of the Commission and subsequent sessions of the ST-SWG);
b) Many delegations expressed a strong desire for further opportunities to add
items to, or subtract items from, this list;
c) The SC only considered scientific needs for the fields of data to be collected
by the ROP;
d) At the ST-SWG, a consensus agreement was reached on slightly over 100
fields of data (those not square bracketed in Appendix III) that should be
collected by the ROP, but consensus was not reached with regard to other
fields; and
e) In some instances the discussion of data fields was made more complicated by
the lack of shared understanding regarding the meaning and purpose of each
proposed field.

4. SC3 further recommended:
   a) The draft list of minimum data fields for the ROP (contained in Appendix III
      of Attachment K) be annotated with explanations of what each field is and
      why it is needed;
   b) The draft list of minimum data fields for the ROP be annotated with detail
      describing the format (units of measure, codes etc) to be used when collecting
      each field (completing the work that was started in SC3-GN-WP-6).

The Intersessional Working Group for the Regional Observer Programme

5. An annotated version of Appendix III of Attachment K of the SC3 Summary
   Report was made available to the first meeting of the Inter-sessional Working Group for
   the Regional Observer programme (IWG-ROP1) at Pohnpei, FSM 24-26 September 2007
   (WCPFC-IWG-ROP-2007/10). There was insufficient time during that meeting to
   further consider this issue and further discussion was deferred to a subsequent meeting of
   the IWG. Two additional data fields, not considered by the SC and which were
   forwarded to TCC by the SC for their consideration, were the Vessel Sightings and the
   Observer Trip Monitoring Summary.

6. The second meeting of the IWG, at Nadi, Fiji 7-10 July 2008, did review the data
   fields as presented in WCPFC-IWG-ROP-2007/10. The outcome of that discussion is
   appended at Attachment A for the information and possible further consideration by the
   ST-SWG.
